

TECHNICAL DATA SHEET (TDS)

CORETRON

1. PRODUCT NAME

CORETRON

2. CLASSIFICATION

Technological feed additive

Functional group: **Anti-caking agent (flow agent)**

CORETRON may additionally be used as a mineral carrier for feed additives and premixtures.

3. IDENTIFICATION OF THE ADDITIVE

- E-Number: **E 551c**
- Name: Kieselguhr (diatomaceous earth, purified)
- CAS No.: 61790-53-2 · EC No.: 612-383-7

4. PRODUCT DESCRIPTION

CORETRON is a natural mineral feed additive based on purified kieselguhr (diatomaceous earth). It is used as a technological anti-caking agent to improve the flowability of feedstuffs and premixtures and to improve moisture control. Due to its highly porous structure and good absorption properties, CORETRON may also be used as a mineral carrier (excipient) for feed additives. CORETRON has no pharmacological or therapeutic effect.

5. AREAS OF APPLICATION

- Complete feedstuffs · Premixtures · Mineral feeds · Carrier for feed additives

Suitable for all animal species, for technological purposes only.

6. AVAILABLE FORMS / PARTICLE SIZES

- Powder (Fine Grade)
- Granulate (various particle sizes on request)

The fraction used in each case is specified in the quotation or order confirmation.

7. DOSAGE

Use in accordance with good manufacturing practice (GMP). The recommended inclusion rate depends on the composition, moisture content, and type of feedstuff.

8. PHYSICAL PROPERTIES

Appearance	Powder or granulate
Colour	Off-white to beige
Odour	Neutral
Solubility	Insoluble in water

9. TYPICAL CHEMICAL PROPERTIES

Silicon dioxide (SiO ₂)	Typically ≥ 80%
Moisture	≤ 3%
pH value (10% suspension)	approx. 7.0–8.5
Specific surface / Water absorption	High, typical for natural kieselguhr
Ion exchange capacity	High — contributes to feed stability, ion binding, improved flowability, and storage stability

10. HEAVY METALS

Heavy metal contents are in compliance with applicable EU requirements for feed additives in accordance with Regulation (EC) No 1831/2003. Batch-specific analytical values are provided in the Certificate of Analysis (CoA).

11. STORAGE

Store in a dry, cool place in the original sealed packaging. Protect from moisture.

12. SHELF LIFE

When stored correctly in the original sealed packaging, the shelf life of CORETRON is not limited.

13. PACKAGING

- 25 kg bags (PE)
- Big Bags (500–1,000 kg)

Other packaging units available on request.

14. LEGAL NOTES

CORETRON is a technological feed additive in accordance with Regulation (EC) No 1831/2003.

The product may additionally be used as a mineral carrier for feed additives and premixtures.

This product is not a feedstuff, not a complementary feedstuff, and not a veterinary medicinal product. No health-related or therapeutic claims are made.
